

Construction Features: The Elements of Quality

	DESCRIPTION	BENEFIT
❶ Frames	Kiln-dried hardwood frames.	Provides a solid foundation that refuses to warp and holds shape beautifully.
❷ Back Construction	Elastic webbing and continuous wire spring backs.	Creates comfortable and consistent support.
❸ Arms	Layers of polypropylene and blended cotton wrapped around arms.	Adds strength, refines shape and provides extra comfort.
❹ Seat Construction	Network of eight-way hand-tied tempered coil springs.	Provides firm, comfortable seat support.
❺ Edge Rolls	Edge rolls on seats and select arms.	Defines contours and edges and enhances comfort.
❻ Back Pillows & Seat Cushions	Plush, enveloping back and seat cushions with a variety of luxurious filling options.	Offers comfortable softness and support.
❼ Joints	Snugly fitted, glued, double doweled joints that are reinforced with corner blocks.	Adds strength and provides a foundation of lasting support.
❽ Seat Deck	Polypropylene topped with a cotton blend insulator covers back and seat springs.	Increases support and stability and adds an added layer of softness and shape.
❾ Seat Base	Non-absorbent, odor-free polypropylene web base.	Protects interior from dust and moisture.
❿ Skirts	Crinol lined skirts with a Pellon insert.	Creates uniform smoothness and a tailored shape that lasts for years.
⓫ Levelers/Glides	Adjustable polyester glides/levelers are standard on all sectionals and all skirted pieces.	Protects floors from scratching and allows furniture to be leveled on carpets and uneven surfaces.
